DETAILED ACTION

This application was filed 3/22/2004. Claims 1-11 are before the examiner and are subject to the following election/restriction.

Election/Restrictions

- 1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-11 (in part), drawn to methods of making pyridine wherein the carbonyl compound used is formaldehyde, classified in class 546, subclass 249-255, depending upon an election of a single disclosed reaction to make a single disclosed pyridine.
 - II. Claims 1-11 (in part), drawn to methods of making pyridine wherein the carbonyl compound used is acetaldehyde, classified in class 546, subclass 249-255, depending upon an election of a single disclosed reaction to make a single disclosed pyridine.
 - III. Claims 1-11 (in part), drawn to methods of making pyridine wherein the carbonyl compound used is propionaldehyde, classified in class 546, subclass 249-255, depending upon an election of a single disclosed reaction to make a single disclosed pyridine.
 - IV. Claims 1-11 (in part), drawn to methods of making pyridine wherein the carbonyl compound used is acetone, classified in class 546, subclass 249-255, depending upon an election of a single disclosed reaction to make a single disclosed pyridine.

Application/Control Number: 10/806,061 Page 3

Art Unit: 1625

V. Claims 1-11 (in part), drawn to methods of making pyridine wherein the carbonyl compound used is propionone, classified in class 546, subclass 249-255, depending upon an election of a single disclosed reaction to make a single disclosed pyridine.

- VI. Claims 1-11 (in part), drawn to methods of making pyridine wherein the carbonyl compound used is another ketone not acetone or propionone, classified in class 546, subclass 249-255, depending upon an election of a single disclosed reaction to make a single disclosed pyridine.
- VII. Claims 1-11 (in part), drawn to methods of making picoline wherein the carbonyl compound used is formaldehyde, classified in class 546, subclass 348-353, depending upon an election of a single disclosed reaction to make a single disclosed picoline.
- VIII. Claims 1-11 (in part), drawn to methods of making picoline wherein the carbonyl compound used is acetaldehyde, classified in class 546, subclass 348-353, depending upon an election of a single disclosed reaction to make a single disclosed picoline.
- IX. Claims 1-11 (in part), drawn to methods of making picoline wherein the carbonyl compound used is propionaldehyde, classified in class 546, subclass 348-353, depending upon an election of a single disclosed reaction to make a single disclosed picoline.

Application/Control Number: 10/806,061

- X. Claims 1-11 (in part), drawn to methods of making picoline wherein the carbonyl compound used is acetone, classified in class 546, subclass 348-353, depending upon an election of a single disclosed reaction to make a single disclosed picoline.
- XI. Claims 1-11 (in part), drawn to methods of making picoline wherein the carbonyl compound used is propionone, classified in class 546, subclass 348-353, depending upon an election of a single disclosed reaction to make a single disclosed picoline.
- XII. Claims 1-11 (in part), drawn to methods of making picoline wherein the carbonyl compound used is another ketone not acetone or propionone, classified in class 546, subclass 348-353, depending upon an election of a single disclosed reaction to make a single disclosed picoline.

The inventions are distinct, each from the other because of the following reasons:

a. Inventions I-VI and VII-XII are directed to related processes. The related inventions are distinct if the (1) the inventions as claimed are either not capable of use together or can have a materially different design, mode of operation, function, or effect; (2) the inventions do not overlap in scope, i.e., are mutually exclusive; and (3) the inventions as claimed are not obvious variants. See MPEP § 806.05(j). In the instant case, the inventions as claimed have different products and use different reactants.

Application/Control Number: 10/806,061 Page 5

Art Unit: 1625

Furthermore, the inventions as claimed do not encompass overlapping subject matter and there is nothing of record to show them to be obvious variants.

- b. Inventions I and II-VI are directed to related processes. The related inventions are distinct if the (1) the inventions as claimed are either not capable of use together or can have a materially different design, mode of operation, function, or effect; (2) the inventions do not overlap in scope, i.e., are mutually exclusive; and (3) the inventions as claimed are not obvious variants. See MPEP § 806.05(j). In the instant case, the inventions as claimed have different products and use different reactants. Furthermore, the inventions as claimed do not encompass overlapping subject matter and there is nothing of record to show them to be obvious variants.
- c. Inventions VII and VIII-XII are directed to related processes. The related inventions are distinct if the (1) the inventions as claimed are either not capable of use together or can have a materially different design, mode of operation, function, or effect; (2) the inventions do not overlap in scope, i.e., are mutually exclusive; and (3) the inventions as claimed are not obvious variants. See MPEP § 806.05(j). In the instant case, the inventions as claimed have different products and use different reactants. Furthermore, the inventions as claimed do not encompass overlapping subject matter and there is nothing of record to show them to be obvious variants.
- 2. Because these inventions are independent or distinct for the reasons given above and there would be a serious burden on the examiner if restriction is not required

because the inventions have acquired a separate status in the art due to their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

3. Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention or species may be made with or without traverse. To reserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.

Should applicant traverse on the ground that the inventions or species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the inventions or species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C.103(a) of the other invention.

4. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim

Art Unit: 1625

remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

5. Any inquiry concerning this communication or earlier communications from the examiner should be directed to D. Margaret Seaman whose telephone number is 571-272-0694. The examiner can normally be reached on 730am-4pm, Monday-Thursday.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Thomas McKenzie can be reached on 571-272-0670. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free). If you would like assistance from a USPTO Customer Service Representative or access to the automated information system, call 800-786-9199 (IN USA OR CANADA) or 571-272-1000.
